

Erica and Robyn's Science Day 22.04.2020

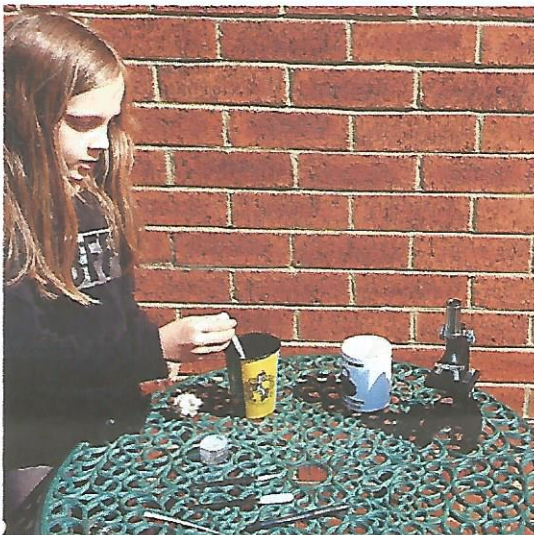

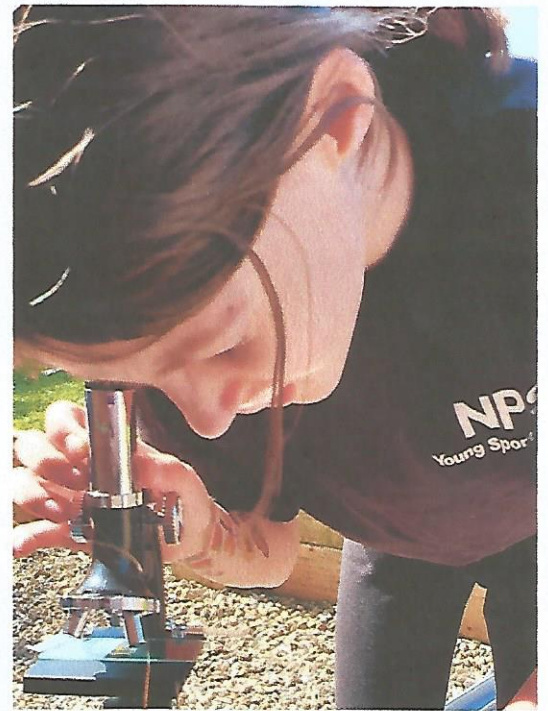

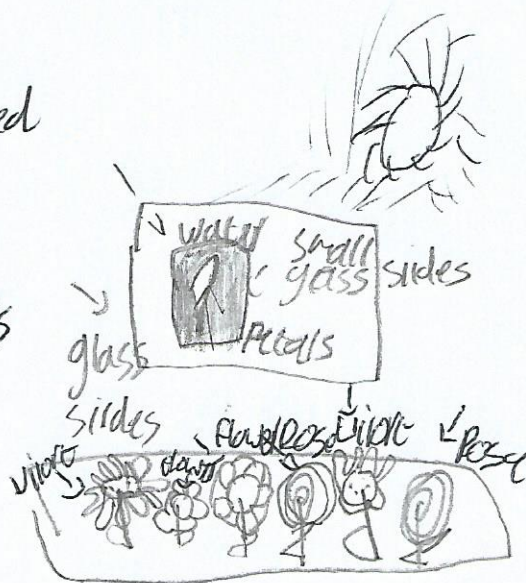

What we used (equipment, materials etc):

me and erica was using a Microscope and a Pipette. and put water and petals together or soil was really good with the water. ^{The} Pipette

What we saw:

everything looked bigger under the microscope. When we put water and petals together they were floating.

Was it a good day?

Yes It was a good day because when we put the water with the mud it was the best. ^{the} water ^{is} all.

xx FROM Robyn 😊

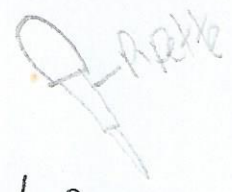

Erica and Robyn's Science Day 22.04.2020

What we used (equipment, materials etc):

me and Robyn went outside and got our

- microscope
- pipette
- glass slides
- Soil, Pettes, water and Rocks

my Mum and adam told me how to use it and it was cool.

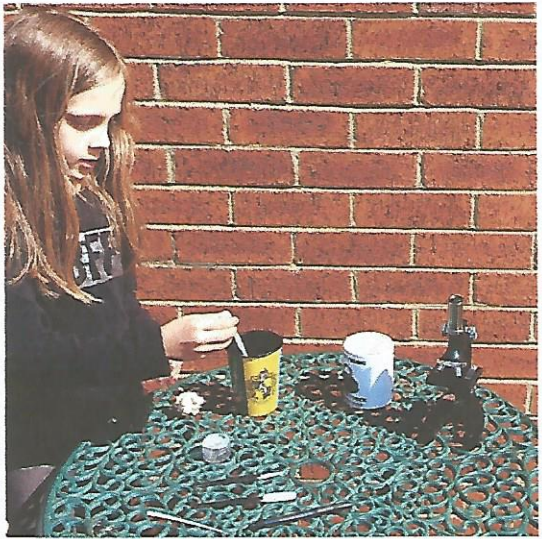

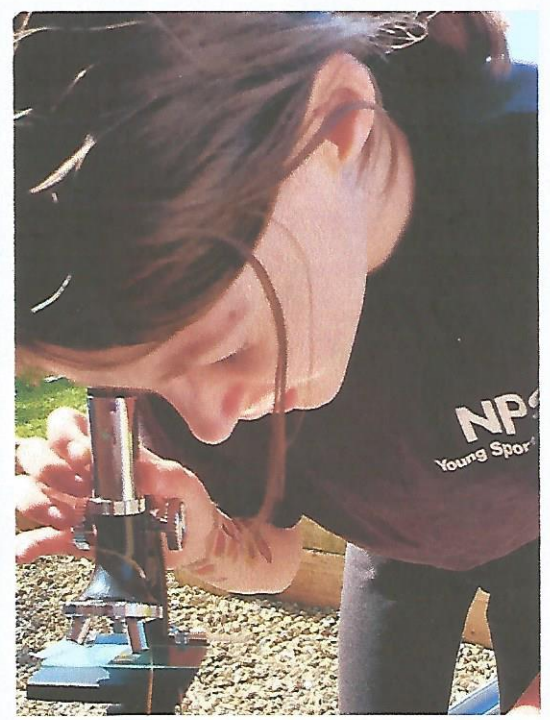

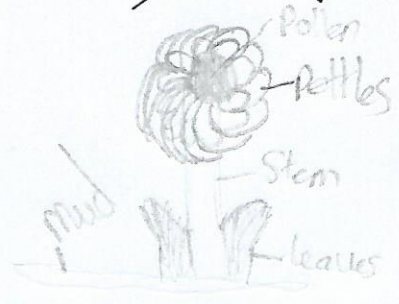

What we saw:

When we put the glass slide with something on it it was amazing! It was like you were in a different world because it looked weird, Cool and made you say wow!

We saw things!

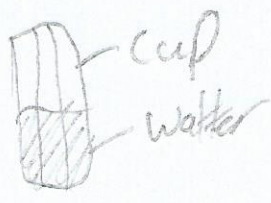

- moving
- digging
- stillness

and there were lots of rainbow ~~colours~~ colours.

Was it a good day?

Yes!! Because it was all about science and we saw lots of cool things through the hole.

A plastic life
